ANALISIS IG - PERFORMANCE

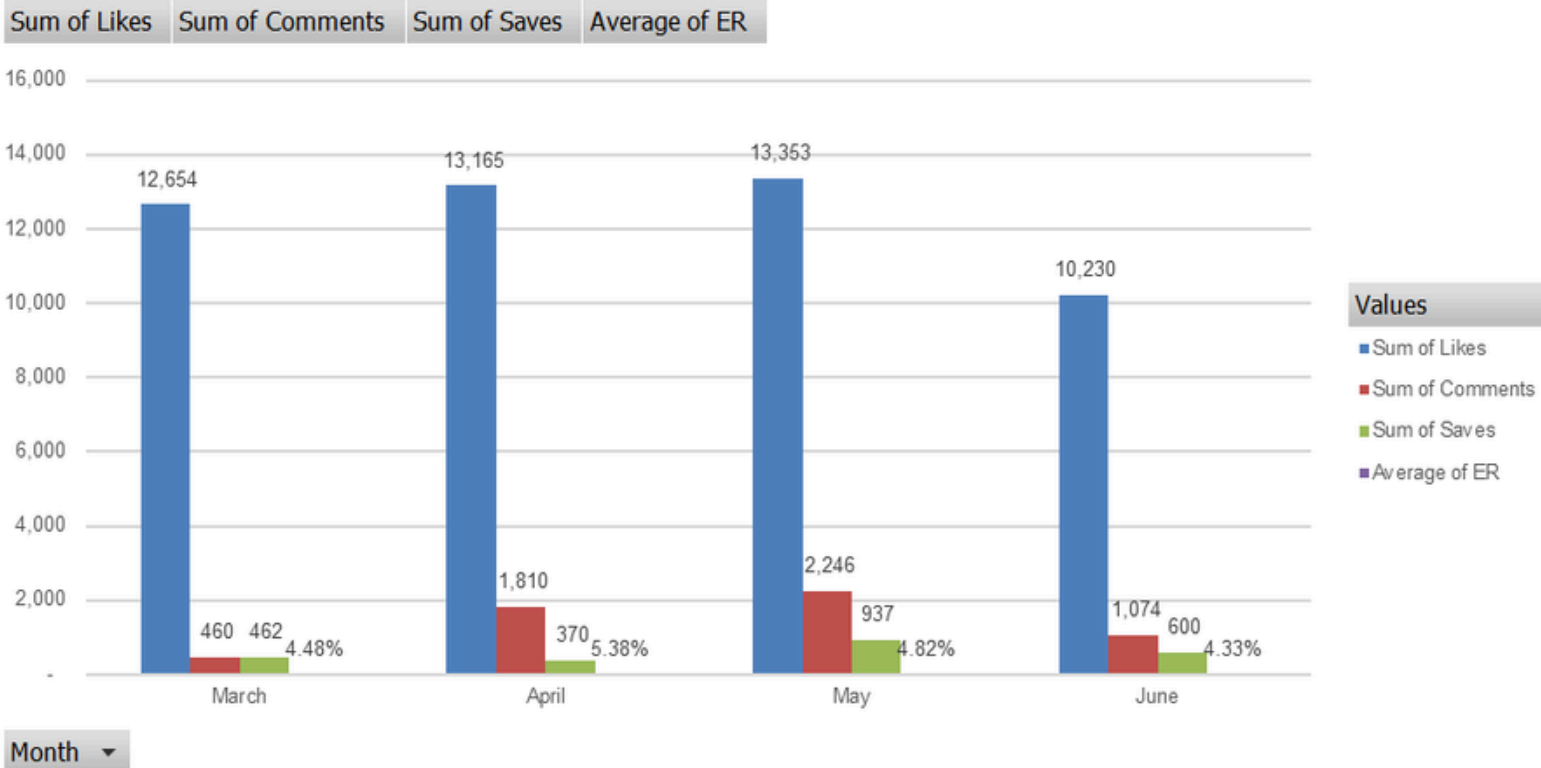

FOLLOWERS GROWTH

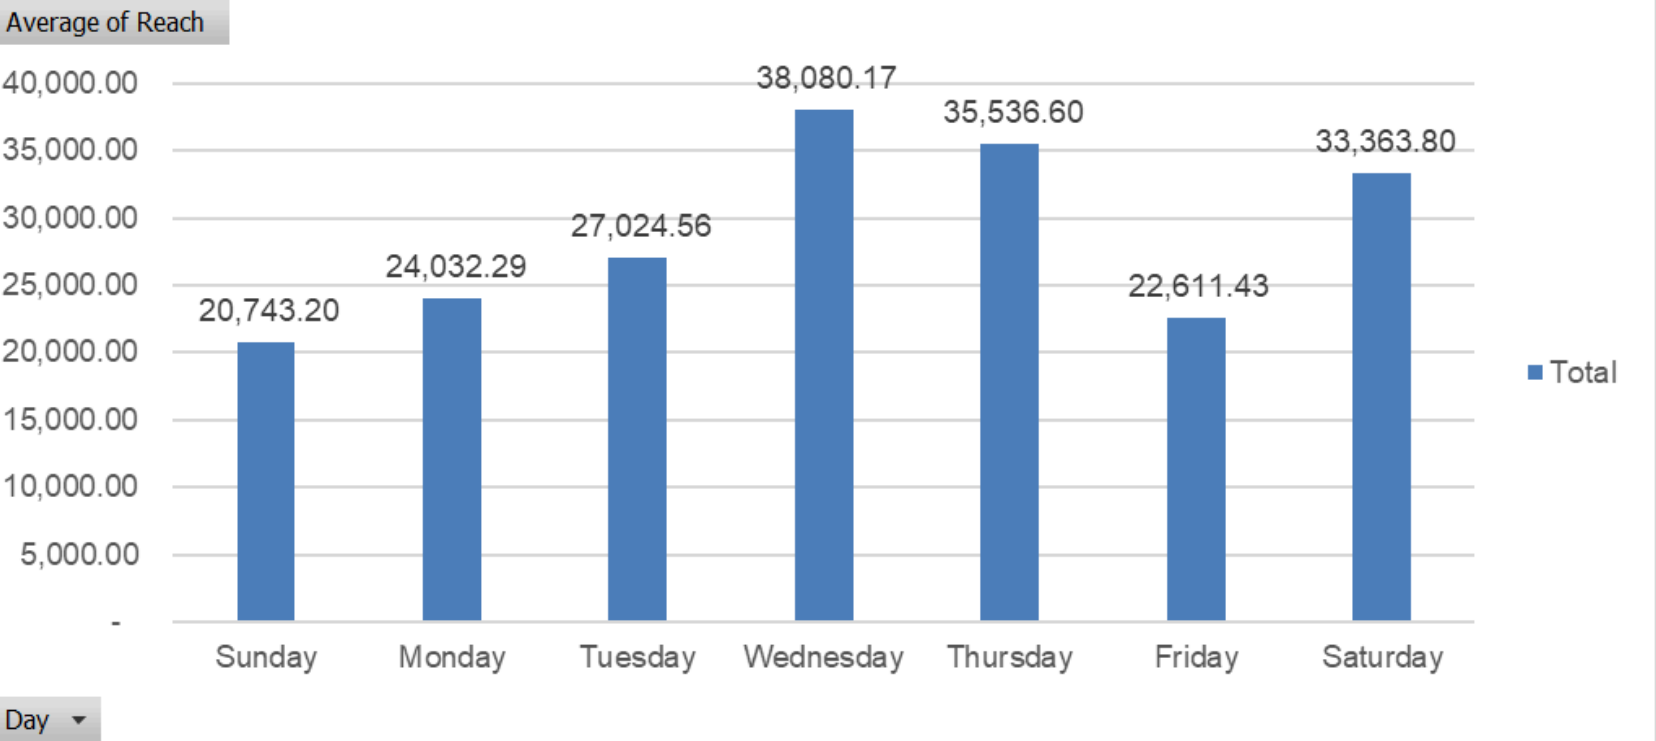

IG FEED - POST TYPE

IG FEED - MONTHLY ENGAGEMENT

IG FEED - BASED ON DAYS

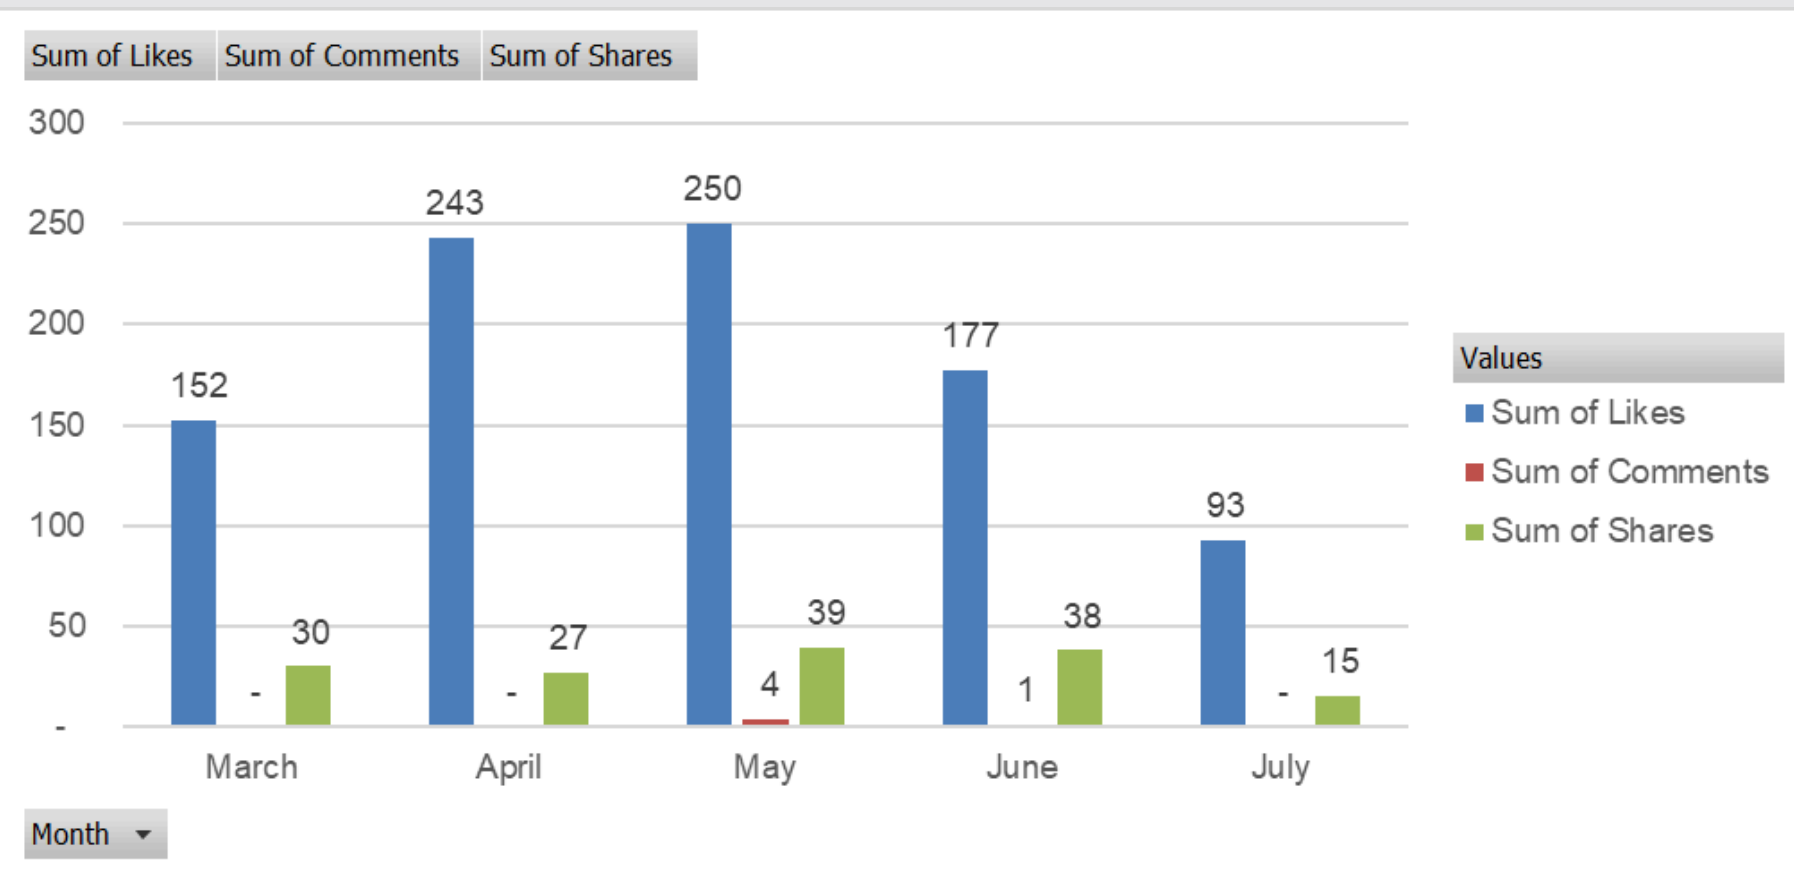

ANALYSIS IG - PERFORMANCE

	KEY POINT	RECOMMENDATION
IG Followers Growth	Followers grew from 412K (Feb) to 414K (Jun) , +1,850 net . However, May saw a -440 decline , likely due to reduced posting cadence and lower-quality content.	Maintain a consistent posting schedule of 3–4x per week. Focus March-level engagement by replicating top-performing Single Image and Multiple Images content. Activate follower re-engagement campaigns in slow months.
Content Format Winners	Single Image posts achieve the highest Avg Likes (1,514) . Multiple Images also strong at 1,366 Avg Likes . Motion posts underperform across all metrics.	Prioritize Single Image and Multiple Images (carousel) formats. Reduce Motion-only posts or use Motion only for Stories. Carousels drive saves which boost IG algorithm distribution.
Best Posting Days	Wednesday and Thrusday show highest average reach and likes . Saturday and Tuesday also perform well . Sunday, Monday and Friday see moderate engagement .	Schedule key content (product launches, promotions) on Wednesday and Thrusday. Use Saturday for brand storytelling content and Friday for promo-teaser posts to capture weekend shopping intent.
Visual Style Performance	Real image content consistently outperforms Vector and Digital Imaging across all metrics (Likes, Reach, Comments). The May post Real image achieved 11,979 Likes and 299K reach .	Invest in authentic photography featuring real people/models using the products. Avoid over-designed or vector content for feed posts. UGC (User Generated Content) reposts can supplement authentic imagery.

ANALISIS FB - PERFORMANCE

FB - MONTHLY ENGAGEMENT

Total Likes FB Page

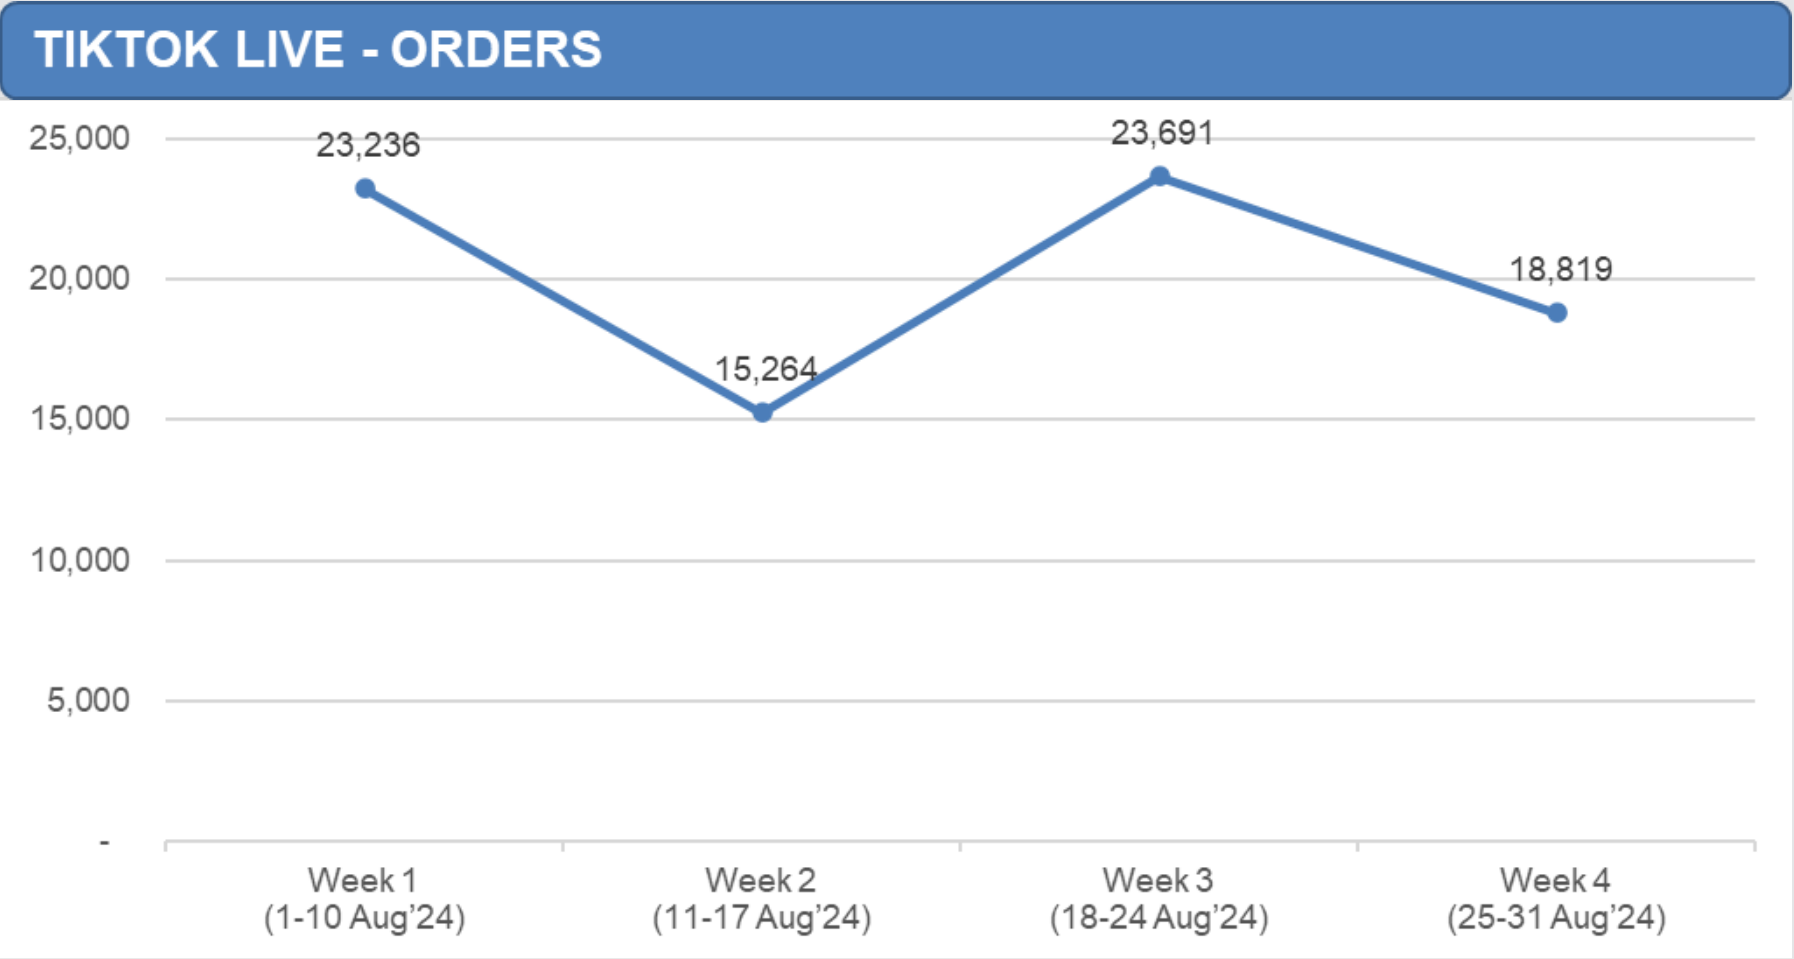

ANALISIS FB - PERFORMANCE

	KEY POINT	RECOMMENDATION
FB Page Likes Decline	Facebook page likes steadily declined from 354,484 (Feb) to 352,667 (Jun) , a total loss of 1,817 fans over 5 months . This is a consistent downward trend.	Facebook organic reach is algorithmically limited. Boost top-performing posts with a minimal budget (Rp 50-100K/post) to expand reach. Run a Facebook engagement campaign targeting 25-35 year old women in Tier 1-2 Indonesian cities.
FB Engagement	Facebook posts have very low comment rates (near zero most months, except May with 4 comments).	Create content that drives shares: beauty tips, 'how-to' tutorials, and relatable content. Run a 'share to win' contest tied to a product launch. Respond to all comments within 2 hours to signal activity to the algorithm.

ANALISIS TIKTOK - PERFORMANCE

	KEY POINT	RECOMMENDATION
TikTok Follower Growth	TikTok followers exploded from 1,192 (Feb) to 17,700 (Jun) , a 1,385% increase driven by viral content in April (113,300 likes, 2.4M views on one video) . This is the fastest-growing platform.	Double down on TikTok content investment. Publish 1–2 TikTok videos per week with trending audio. Collaborate with nano and micro KOLs (10K-100K followers) in the beauty niche for cost-effective virality. Capitalize on viral moments immediately with follow-up content.
TikTok Live Shopping (Aug)	TikTok Live generated IDR 9.4 Billion GMV in August across 1,205 live sessions. Week 1 and Week 3 outperformed (IDR 2.9B and 2.4B respectively) . Average conversion rate was 1.13%, with 81,000 total orders .	Increase live session frequency during peak hours (7–10 PM WIB). Assign dedicated hosts with strong product knowledge. Implement flash sale mechanics (limited-time vouchers) during the first 10 minutes of each live. Target 1.5% conversion rate by training hosts on objection handling.
TikTok Post Engagement	TikTok posts show high variance in engagement rate (4.7%–15.9%) . The April viral video (2.4M views, 4.7% ER) has massive organic reach potential. Small posts under 1K views have high ER but minimal impact.	Focus on 1 hero video per week with strong hook in first 3 seconds. Use trending sounds, GRWM (Get Ready With Me) format, and transformation reveals. Invest in boosting top-performing organic posts via TikTok Ads to amplify reach further.

STRATEGIC PRIORITIES & ACTION PLAN

	KEY POINT	RECCOMENDATION
Priority 1: TikTok-First Strategy	TikTok is the highest-growth platform with proven e-commerce conversion (IDR 9.4B GMV in August alone). The April viral post proves content virality is achievable.	Allocate 50% of content budget to TikTok (posts + live shopping). Set monthly GMV target: IDR 12B. Run Harbolnas campaign via TikTok Live with 8-hour stream.
Priority 2: IG Carousel & Saves Optimization	Saves are the strongest IG algorithmic signal. Multiple Images (carousel) content and single posts achieve good perfom. Current saves are underperforming relative to likes.	Create 'swipe-worthy' educational carousels. Target 200+ saves per carousel post. Include a 'Save this for later' CTA in captions.
Priority 3: Facebook Monetize via Ads	Organic FB performance is declining. The platform is mature but has a large existing audience of 352K fans that can be leveraged via paid amplification.	Run Facebook retargeting ads to existing fans with Shopee/TikTok Shop product links. Budget: Rp 5M/month. Focus on 'top of funnel' awareness for new product launches.
Priority 4: KOL & UGC Program	Authentic real-image content outperforms across all platforms . Building a community of brand advocates can scale content production cost-effectively.	Launch 'Beauty Squad' A KOL program (5K-50K followers). Recruit 20 KOLs/month. Provide products + brief. Repurpose top UGC as paid ads (whitelisted content). Target 50 UGC posts/month by Q4.
